SUMMARY

Computer Science graduate with practical experience in full-stack development and AI/ML research. Experienced in building scalable web applications using server-side business logic, dynamic client-side interfaces, secure authentication and well-structured RESTful APIs. Strong foundation in data structures, algorithms, system design, SQL, and database design.

SKILLS

Language: Java • Python • JavaScript • C

Backend: Spring Boot • REST APIs • Spring Security • JWT • Node.js

Frontend: Angular • React • Next.js • TypeScript • Tailwind CSS

Databases: PostgreSQL • MySQL • SQLserver • MongoDB

Developer Tools: Git • GitHub • Docker • Railway • Vercel • Netlify • Figma

EXPERIENCE

Software Engineering Intern

July 2026 – August 2014

Company - CodeAlpha

- Designed and developed two full-stack applications end-to-end, architecting scalable software solutions and implementing advanced data structures to guarantee production-grade performance.
- Designed scalable backend modules and optimized application performance.

PROJECTS

Document Management System - Full Stack Application

[FRONTEND](#) | [BACKEND](#)

Spring Boot • Angular • PostgreSQL • Spring Security • JWT • REST APIs

- Developed a full-stack application for secure document management, automated data extraction, and report generation.
- Built scalable REST APIs using a layered Controller–Service–Repository architecture with JWT authentication and role-based access control.
- Designed a dynamic database architecture that automatically creates and reuses schemas based on uploaded file structures.
- Processed PDF, Excel, and CSV files into structured database records using Apache POI and iTextPDF..
- Developed an Angular dashboard with data preview, filtering, report generation, and PDF/Excel export features.

EyeCareAI - AI-Assisted Eye Disease Detection Platform

[CODE](#)

Next.js • Node.js • MongoDB • Python • TensorFlow • EfficientNetB0 • ResNet50

- Developed an AI-powered telemedicine platform with role-based access for patients, doctors, and administrators.
- Trained deep learning models on 4,217 retinal images (augmented to ~21K), achieving 91.8% accuracy and a 0.916 macro F1-score.
- Implemented appointment scheduling, secure medical record management, and an OpenStreetMap-powered hospital locator.
- Integrated AI-driven disease prediction for remote eye disease screening.

TeamSync – A Real Time Communication Platform

[LIVE](#) | [CODE](#)

Next.js 15 • React 19 • TypeScript • Firebase • Firestore • Google Genkit • Tailwind CSS

- Developed a real-time enterprise collaboration platform with video conferencing and instant messaging.
- Implemented Firebase Authentication and Firestore Security Rules for secure user management and data access.
- Integrated AI-powered meeting summarization and content enhancement using Google Genkit (Gemini 2.5 Flash).
- Built real-time collaborative workspaces with persistent session history using Firestore synchronization.

Clothiva - Ecommerce Store

[LIVE](#) | [CODE](#)

React • Node.js • Express.js • MongoDB

- Developed a full-stack e-commerce platform with secure authentication and shopping cart functionality.
- Built an admin dashboard for managing products, inventory, and customer accounts.
- Designed backend logic for managing products, users, and order-related operations using database integration

PUBLICATION

Cotton Leaf Image Dataset for Disease Classification and Health Monitoring

Shafaeat Hasan Toufiq, et al.

Data in Brief (Elsevier), 2025

- Supported development of AI/ML models for automated plant disease classification and health monitoring.
- DOI: <https://doi.org/10.1016/j.dib.2025.112142>

EDUCATION

Bachelor of Engineering, Computer Science

East West University · 2021-2026
